

Oregon Urological Society Summer Update

MISSION

To enhance the delivery and quality of urologic care through education and advocacy for patients and health care providers.

Stakeholder Focus Group on the Challenges Facing Prostate Cancer

The Oregon Urological Society is in preparation of facilitating a focus group to identify the challenges facing prostate cancer. Oregon is joining 3 other states in conducting a multi-stakeholder discussion to include at minimum, urologists, patients, family practice, oncologists, elected officials and others.

Information discovered during the focused group will be shared in a future OUS Membership e-News and press release. It will also be incorporated into the strategic planning of the society for 2019.
